

SELLING TIPS & FAQs

Severe Duty Angle Broom

FEATURE: Built Extremely Rugged

REASON: 1) Designed to fill a need with commercial road work contractors needing both added durability and functionality

FEATURE: Dual A-frame Pivot Design with Hinge Point

REASON: 1) Much heavier than competition in this area and also allows for the cylinder and valve to be more protected

FEATURE: Floating Head

REASON: 1) Allows bristle to follow ground contours and reduces wear on bristles. This function also reduces stress on the frame

FEATURE: Angles While Sweeping

REASON: 1) Many brooms do only one function at a time

FEATURE: 32" Bristles

REASON: 1) Longer life compared to smaller bristles

FEATURE: 2" Spindle and Oversize Bearing

REASON: 1) Built to withstand the rigors of heavy use. Many competitors are 1" to 1.5"
2) Welded cylinder
3) Versus tie rod. More durable and repairable

FEATURE: Grease Fittings on all Pivot and Hinge Points

REASON: 1) Better maintenance leads to longer life of unit

FEATURE: Replaceable Hood

REASON: 1) In the event of damage, the hood can be replaced versus units that are welded

FEATURE: Built in Relief Valve to Protect Breakage of Drive Unit

REASON: 1) Does not rely on the skid steer relief valve to protect the motor

FEATURE: Brooms Stands Fold Up and Pin Out of the Way

REASON: 1) Many slide up in a holder that tends to get caught on things and bend

FEATURE: Water Kit

REASON: 1) Any competitors do not have a water kit for angle brooms. This kit mounts to the frame versus sitting over the bristles causing excess wear
